Software Engineer

I am a software engineer with a background in healthcare. Organization, helping others and finding solutions to problems are my passion. Whether that be fixing a bug in code, helping a patient get back to their passion, or picking the perfect line to ride on my mountain bike or skis. My experience has prepared me to solve problems quickly and efficiently. I am seeking a dynamic job that cultivates creative problem-solving and organizational skills.

Skills

Python | SQL | Postgres | Flask | JavaScript | HTML | CSS | Node.js | MongoDB | Express | React | React Router | Git | Github

Leader | Problem Solver | Detail Oriented | Team Player | Adaptable

Technical Project Experience
